

# Create Node Red Service

<b>Team ID</b>	PNT2022TMID33826
<b>Project Title</b>	Smart Waste Management System for Metropolitan cities

The screenshot shows the IBM Cloud Developer console interface. At the top, there's a navigation bar with 'Catalog' and 'Create app' links. Below this, a sidebar on the left contains 'About' and 'Create' tabs. The main content area displays the 'Node-RED' starter kit details. The 'Overview' section explains that the starter kit provides a pre-configured Node-RED application with a Cloudant service for storing application flow configurations. It guides the user through adding services, generating and downloading code, using the IBM Cloud Developer Tools CLI for local development, and finally deploying to Cloud Foundry or a DevOps Pipeline. A section titled 'This starter kit will help you' lists three key capabilities: generating an application with Node-RED, generating files for deployment to Cloud Foundry or DevOps Pipeline, and connecting to provisioned services. At the bottom, a 'What's included?' section is partially visible, along with a 'View docs' link. The bottom of the image shows the Windows taskbar with various application icons and the system clock indicating 11:04 AM on 11/13/2022.
